

# UR Safe Security

+  
**Securecy**

Working together for  
superior client outcomes

## UR Safe Security and Securecy

UR Safe Security uses the Securecy software platform for all of their compliance, rostering and administration needs.

Securecy is an award winning cloud software platform designed specifically for Australian Security Providers.

Securecy is a complete 'end to end' administration platform for static and mobile workforces, featuring electronic incident reporting, automated licence checking and tracking, rostering, shift sign on and sign off - including electronic signature capture, automated timesheets, report building, HR, staff messaging, document uploads and much more.

## Benefits to the clients of UR Safe Security

The Security industry is highly regulated, varied and ever evolving.

So it's critical for Security providers to engage the very best technology and systems available to address all of the complex compliance, HR and administrative requirements of the industry.

The team at Securecy understands the needs of security providers and work closely with clients to tailor outcomes specific to particular requirements.

The benefits of having an industry leading platform flow through to superior outcomes for clients of UR Safe Security.

# Securecy Features

- Rostering

Comprehensive, flexible - template shifts, bulk shifts, contractor shifts, split shifts.

- Licence management

Keep up-to-date with personnels' licences.

Alerts to management and staff.

- Payroll

Custom payroll output for seamless integration with accounting software.

- Document Management

All compliance, training and administration documents in one place. Accessible, categorised, available to selected access levels.

- Compliance

Compliance is at the very heart of Securecy. Customised for each jurisdiction.

- Reporting

Compliance reports, operational reports, HR reports, fixed reports, custom reports, report builder.

- Timesheets

- Staff Induction

Compel staff to read and acknowledge documents before they can accept a shift.

- Mobile Patrol

Patrol notes, check in-out, check lists, photo upload, QR code, automated reporting. All GPS tracked.

## Compliance

Compliance is at the very heart of Securecy.

Securecy makes the whole process of compliance and incident reporting simple for everyone - security personnel, management - and especially authorities.

Reports and data can be sent to authorities quickly and easily from within the system, which often prevents the need for authorities from having to visit venues and locations.

The team at Securecy has worked with multiple regulators across different jurisdictions to ensure Securecy meets or even exceeds mandated requirements.
